

A Comparative Study on Analysis of Cricket Academy of Dakshina Kannada and Uttara Kannada Districts

Altaf Sab,

Physical Director, University Evening College, Mangalore,
Department of Physical Education and Sports Mangalore, Karnataka.

Abstract

The purpose of the present study is to participate in, the achievements, and facilities of each academy of both districts. Investigative study on the cricket academies of Dakshina Kannada and Uttara Kannada district in the top 12 sports accomplished cricket academy. its encouragement to bring esteem to the concerned cricket academy's Dakshina Kannada and Uttara Kannada at the Division level, state level, and Indian University level, national and international level of competition. a collection of cricket academy surveys with an overall sample size of n=12. The cricket academy in each Dakshina Kannada and Uttara Kannada district cricket academy requires data concerning the cricket academy of Dakshina Kannada and Uttara Kannada district. The results suggest that different Cricket academies come under the Karnataka State Cricket Association or non-Karnataka State Cricket Association Dakshina Kannada and Uttara Kannada district cricket academies are national and international level competition and facilities fitness centres, coaches, indoor facilities, outdoor facilities, training, coaching camps, implementation of modern technology and other outdoor facilities have to be improved and some facilities have to provide to develop for the increase their level of cricket achievements in the academy's for contribute for their respective university level and district level and national level cricket tournaments under the BCCI or KSCA.

Keywords: *cricket academy, facility, achievement.*

Introduction

Cricket, a sport that has captivated audiences worldwide for centuries, boasts a rich and intriguing history, tracing its roots back to the 16th century. The earliest definitive reference to cricket emerged in 1598, hinting at its existence even earlier (Altham, 1962). While the exact origins of cricket remain shrouded in mystery, most accounts point to its genesis in southeast England, particularly within the counties of Kent, Sussex, and Surrey (Altham, 1962).

In its initial stages, cricket was predominantly a children's pastime, played in rustic settings such as grazing grounds and forest clearings (Altham, 1962). The game's popularity soared in the early 17th century, captivating the attention

of working-class men (Altham, 1962). During the reign of King Charles I, cricket witnessed a surge in patronage from the gentry, who relished both playing and wagering on matches (Altham, 1962). Gambling became an integral aspect of cricket, fueling its popularity during the Restoration period (Altham, 1962).

As cricket's prominence grew, so did the emergence of professional players and cricket clubs. The establishment of the first major cricket club marked a significant turning point, cementing the sport's status as a popular social activity, particularly in London and the south of England (Altham, 1962).

Cricket's global expansion can be attributed to the influence of British colonialism and maritime trade. English colonists introduced cricket to North America and the West Indies, while sailors and traders of the East India Company disseminated the game to the Indian subcontinent (Altham, 1962). The game's adaptability to diverse terrains and social settings facilitated its widespread adoption across the globe.

In 1877, the inaugural international cricket match between England and Australia took place, marking a pivotal moment in the sport's history (Altham, 1962). This milestone event heralded the beginning of international cricket competitions, further propelling the sport's global recognition and appeal.

Today, cricket stands as a truly global phenomenon, played and enjoyed by over 100 countries worldwide (ICC, 2023). The International Cricket Council (ICC) serves as the governing body of the sport, overseeing international tournaments and fostering cricket's continued growth and development.

Importance of cricket

Cricket, a sport that has captivated audiences worldwide for centuries, stands as a testament to the transformative power of physical activity. Beyond its thrilling gameplay and competitive spirit, cricket fosters a culture of discipline, teamwork, and personal growth, leaving an indelible mark on the lives of its players.

At its core, cricket embodies the essence of teamwork. Unlike individual sports, where victory hinges solely on the prowess of a single player, cricket demands a collective effort (Encyclopedia Britannica, 2023). Each player, from the wicketkeeper to the batsman to the bowlers and fielders, plays a pivotal role in achieving the team's ultimate goal – victory. This shared responsibility cultivates a sense of camaraderie and unity, fostering a team spirit that extends beyond the cricket pitch.

The game's emphasis on discipline is another cornerstone of its appeal. Cricket demands unwavering focus, adherence to rules, and the ability to maintain composure under pressure (Gupta, 2022). Players must master their techniques, respect the game's etiquette, and navigate the complexities of gameplay with strategic thinking and adaptability. This commitment to discipline instills valuable life lessons that extend beyond the sporting arena, shaping individuals who are responsible, organized, and capable of navigating challenges with grace and resilience. Cricket also serves as a crucible for developing leadership qualities. The game demands strategic thinking, the ability to inspire and motivate teammates, and the courage to make bold decisions under pressure (Gupta, 2022). Captains, in particular, must embody these leadership traits, guiding their teams through the ebb and flow of the game, fostering trust, and instilling a shared sense of purpose.

Beyond its impact on personal development, cricket also offers a plethora of health benefits. The sport enhances physical fitness, improving grip strength, stamina, eyesight, and overall body strength (Gupta, 2022). The repetitive movements involved in batting, bowling, and fielding strengthen muscles, improve coordination, and enhance agility. Additionally, the mental challenges of cricket stimulate cognitive function, promoting strategic thinking, quick decision-making, and the ability to maintain focus under pressure.

The Role of Cricket Academies in Fostering Sports Achievement

Cricket academies play a pivotal role in nurturing aspiring cricketers and propelling them towards professional careers (Verma & Gandhi, 2017). These academies provide a comprehensive training environment, encompassing technical skill development, tactical understanding, and mental conditioning, to equip players with the necessary tools to excel on the field.

The primary objective of cricket academies is to cultivate a pool of talented cricketers who possess the potential to represent their country at the highest level (Verma & Gandhi, 2017). Through rigorous training programs and exposure to competitive matches, academies strive to identify and nurture raw talent, transforming them into skilled and disciplined athletes.

Effective cricket academies foster a holistic approach to player development, extending beyond technical proficiency to encompass physical fitness, mental toughness, and leadership skills (Gupta, 2022). Players undergo a rigorous training regimen that enhances their physical strength, agility, and stamina, enabling them to withstand the demands of the game at the highest level.

In addition to physical conditioning, cricket academies emphasize the development of mental fortitude, preparing players to navigate the psychological challenges of competitive cricket (Gupta, 2022). Players learn to manage pressure, maintain focus under duress, and develop the resilience to overcome setbacks.

Leadership qualities are also nurtured within cricket academies, empowering players to assume leadership roles both on and off the field (Gupta, 2022). Players develop strategic thinking, communication skills, and the ability to inspire and motivate their teammates.

The impact of cricket academies extends beyond individual player development, contributing to the overall growth of the sport at the national and international levels (Verma & Gandhi, 2017). By producing a steady stream of talented players, academies fuel the success of national teams and enhance the global appeal of cricket.

The Importance of Sports Infrastructure

Sports infrastructure plays a crucial role in promoting sports participation and achieving success at the national and international levels (Verma & Gandhi, 2017). Adequate sports facilities, including well-maintained grounds, equipment, and training facilities, are essential for fostering a culture of sportsmanship and nurturing the talent of aspiring athletes.

Government support is another critical factor in driving sports participation and achievement (Verma & Gandhi, 2017). Government policies that promote sports education, provide financial assistance to promising athletes, and invest in sports infrastructure can significantly enhance a nation's sporting prowess.

The Role of Schools in Sports Development

Schools play a fundamental role in introducing children to sports and nurturing their sporting talents (Verma & Gandhi, 2017). By incorporating physical education and sports activities into the school curriculum, schools provide children with opportunities to develop physical fitness, teamwork skills, and a love for sports.

Schools should also strive to provide access to adequate sports facilities and equipment for all students, regardless of their socioeconomic background (Verma & Gandhi, 2017). This will ensure that every child has the opportunity to participate in sports and discover their sporting potential.

Cricket academies, sports infrastructure, and the role of schools in sports development are all interconnected elements that contribute to the overall success of a nation in the sporting arena. By fostering a culture of sportsmanship, providing quality training facilities, and nurturing talent from a young age, countries can lay the foundation for sporting excellence and achieve recognition on the global stage.

Need for Training

Training improves a person's skill, his power of intelligence and develops in him the desired attitudes and values required for his work. It helps the new players to acquire skills and the latest knowledge makes them familiar with the objectives of the organization to which they belong and helps to make their potential contribution to his/her task.

Objectives of The Study

Objective 1: To compare the player strength of cricket clubs in Dakshina Kannada district and Uttara Kannada district.

Objective 2: To compare the involvement of cricket academies in Dakshina Kannada district and Uttara Kannada district.

Objective 3: To compare the successes of cricket academies in Dakshina Kannada district and Uttara Kannada district.

Objective 4: To compare the infrastructure of cricket academies in Dakshina Kannada district and Uttara Kannada district.

Hypothesis

H1: There will be a significant difference in player strength of clubs of Dakshina Kannada district and Uttara Kannada district

H2: There will be a significant difference in the involvement of academies of Dakshina Kannada is better than Uttara Kannada district.

H3: There will be a significant difference in the successes of academies of Dakshina Kannada district is better than Uttara Kannada district.

H4: There will be a significant difference in the infrastructure of academies of Dakshina Kannada is better than Uttara Kannada district.

The Delimitations of the Study

The study was surrounded by twelve academies (n=12), each district six who agreed to attend as subjects in the study.

The study is delimited by the academy of Dakshina Kannada and Uttara Kannada districts.

Evaluate to achievements, infrastructure, and contribution of the academy's Dakshina Kannada and Uttara Kannada districts.

The study is delimited to the leather ball cricket academy only.

The Limitations of The Study

- The questionnaire has its limitations. The limitation of the study is a bias that may enter into the subjects.
- It is a limitation of studies if socio-economic factors, cannot be controlled by the researcher.
- Cooperation from the President, members, and administrators during the study was outside the control of the researcher.

Method and Procedure

It is purely a survey study. The systematic sampling design was used. There are six from the Dakshina Kannada district and six from the Uttara Kannada district academy were randomly selected for this study. the purpose of this study was to achieve and participate in the cricket Dakshina Kannada and Uttara Kannada cricket academy, in it may come to know that, participation in various cricket tournaments conducted by Dakshina Kannada and Uttara Kannada Cricket Academy. The base of every child is made. Every child has the right to go to school fulfill his visions and achieve his aims in life through Improvement. Nowadays, sport is a fundamental part of every school curriculum. Every child has an equal right to get the sports facility and participate in different sports competitions held in the school

Sources of Data

Data for the study will be collected from the affiliated cricket academies of Dakshina Kannada and Uttara Kannada districts, with the help of a questionnaire prepared in meetings and interviews with existing cricket game field authorities and coaches.

The analysis of data

To give a connotative touch to survey data, a few relevant and proper statistical tools and techniques have been used such as mean, standard division, t-test, and percentage. Where it was possible bar diagrams were incorporated and analyzed.

Statistical analysis

After getting data, were put into tables and graphs for the achievement participation, cricket academy' participation, and performance in the different disciplines like sports which shows the players' performance in the cricket academies Dakshina Kannada and Uttara Kannada district

Hypothesis 01

H1: There will be a significant difference in player strength of clubs of Dakshina Kannada district and Uttara Kannada district

TABLE 01: PLAYER'S STRENGTH OF DAKSHINA KANNADA AND UTTARA KANNADA CRICKET ACADEMY

VARIABLE	ACADEMY	N	MEAN	SD	T-TEST	P-VALUE
PLAYERS STRENGTH OF CRICKET ACADEMY	D.K	6	48.33	13.43	1.6753	0.1248
	U. K	6	31.66	20.34		

(Significant at 0.05level)

Table 01 and graph 01 show that the mean of the Dakshina Kannada district cricket Academy player's strength is 48.33 and the mean of the Uttara Kannada district cricket academy players' strength is 31.66. for obtaining the significant differences between the two means, the two samples "t" test was calculated at 0.005 level. the "p" value obtained was 0.1248, However, the 95% confidence interval of this difference. The study suggested that the

Dakshina Kannada district cricket academy players' strength is higher than the Uttara Kannada district cricket academy players' strength.

Hypothesis 02

Sports Infrastructure Facilities

Table 2: The details of cricket facilities available in Uttara Kannada and Dakshina Kannada

Facilities	Dakshina Kannada		Uttara Kannada	
	Number	Percentage	Number	Percentage
Fitness centers	6	80	6	10
Indoor Net Practice Facilities	6	66	6	15
Cricket Ground with Turf Facilities	6	50	6	10
Training and coaching facilities	6	50	6	40
Tournaments	6	50	6	10
Other	6	40	6	20

Table 2 shows that 80 percent of cricket academies under Dakshina Kannada and Uttara Kannada have fitness centers. 66 percent of academics under Dakshina Kannada and 15 percent of Uttara Kannada have Indoor Net Practice Facilities, 50 percent of Dakshina Kannada and 10 percent of academies of Uttara Kannada have Cricket Grounds with Turf Facilities, and 50 percent of academies under Dakshina Kannada 40 percent Uttara Kannada having Training and coaching facility and 50 percent of Dakshina Kannada and 10 Percent of academy Uttara Kannada, and 50 of academy of Dakshina Kannada have tournaments and 10 percent academy of Uttara Kannada.

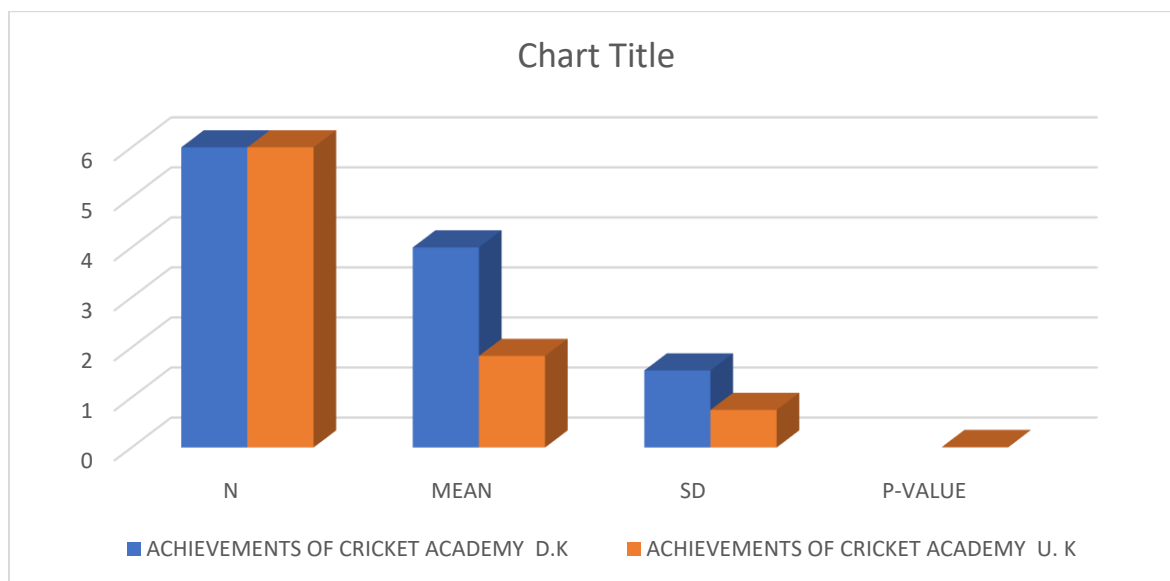

When comparing sports Infrastructure facilities under Dakshina Kannada and Uttara Kannada have good and well-equipped fitness centers, Indoor Net Practice Facilities, training, coaching facilities, and tournaments than the academies' of Dakshina Kannada and Uttara Kannada and infrastructure facilities provided for sports training and coaching, when comparing with Cricket Ground with Turf Facilities Dhashin Kannada having better facilities rather than Uttara Kannada

Hypothesis 03

H3: There will be a significant difference in the Achievements of academies of Dakshina Kannada district is better than the Uttara Kannada district

TABLE 03: ACHIEVEMENTS OF DAKSHINA KANNADA AND UTTARA KANNADA DISTRICT CRICKET ACADEMY

VARIABLE	ACADEMY	N	MEAN	SD	P-VALUE
ACHIEVEMENTS OF CRICKET ACADEMY	D.K	6	4	1.54	0.0112
	U. K	6	1.83	0.75	

GRAPH 03: ACHIEVEMENTS OF DAKSHINA KANNADA AND UDUPI CRICKET CLUBS

Table 02 and graph 02 show that the mean of the Dakshina Kannada district cricket academy achievements is 4 and the mean of the Uttara Kannada district cricket academy achievements is 1.83 for obtaining the significant differences between the two means, the two samples' "t" test was calculated at 0.005 level. The "p" value obtained was 0.0112, However, it is a significantly higher level of significance. The study suggested that the Dakshina Kannada District Cricket Academy's achievements are better than the Uttara Kannada District Cricket Academy players' achievements.

DISCUSSION

The study has been done to investigate a comprehensive survey of cricket academy infrastructure, achievements, and facilities in Dakshina Kannada and Uttara Kannada districts. The present paper exposed that private cricket academies play an acceptable role in the promotion of cricket games. The reason for this type is because the cricket Academy is in a competitive situation where every cricket Academy wants to prove metal of excellence that is why they exist example achieving good coaches, infrastructure, and facilities rather than Uttara Kannada district to better clubs in Dakshina Kannada district

CONCLUSION

Cricket Clubs of the Dakshina Kannada district are ahead in availability as well as in providing good facilities and infrastructure to the new basic cricket player for the promotion of the cricket game because lather ball cricket game needs basic level training and good facilities and turf ground for the tournament. The present study paper recommends that rural areas should take foundational steps for the promotion of leather ball cricket games in Dakshina Kannada and Uttar Kannada districts. A study of cricket academy facilities and achievements at of school level of Uttara Kannada and Dakshina Kannada district some rural area cricket academy should be developed to promote lather ball cricket because our results suggests that some rural cricket in Uttara Kannada district do not have

good facilities and infrastructure. Indoor net practice training should be developed in urban and rural areas cricket Academies at the grassroots level to encourage the new young to choose their career in cricket from the division level to the international level.
