

Nurturing Excellence: Cross sectional survey on Nursing student's satisfaction

Author : Ms.Sinsha K, Lecture community health nursing department

Abstract:

This cross-sectional survey aimed to assess students' satisfaction with various aspects of institutional facilities and the evaluation system. Employing a survey methodology, data was collected from Nursing student population, revealing overwhelmingly positive sentiments towards college facilities and the evaluation system. Key findings indicated very high satisfaction levels across the board. However, students provided constructive feedback, suggesting improvements such as the need for expanded ground space, extended library hours, and increased outpass hours. Following a meticulous analysis of survey results, the institution promptly addressed the identified concerns, implementing corrections and keeping students informed. This study highlights the importance of continuous feedback loops in ensuring a responsive and student-centric educational environment.

Key words: satisfaction, institutional facilities, evaluation system

Introduction

In the dynamic realm of healthcare, the role of nursing professionals is pivotal in ensuring the well-being of patients. As aspiring caregivers, nursing students undergo rigorous academic and clinical training, making their educational journey a critical aspect of future healthcare delivery. Understanding the factors that contribute to nursing students' satisfaction is paramount in fostering a positive and conducive learning environment. This article delves into the multifaceted aspects that shape the satisfaction levels of nursing students, aiming to shed light on the key elements that can enhance their educational experience and, ultimately, influence their future contributions to the healthcare landscape.

Needs and Significance of the study

The need for this study arises from the imperative to prioritize and enhance the overall student experience within educational institutions. Understanding students' satisfaction with institutional facilities and the evaluation system is crucial for identifying areas of improvement and ensuring that the learning environment is conducive to academic and personal growth. By conducting this study, the institution aims to gather valuable insights into student perspectives, address existing concerns, and proactively implement changes that align with students' expectations. This proactive approach not only fosters a positive learning environment but also demonstrates the institution's commitment to continuous improvement and responsiveness to student feedback.

Objectives of the study

1. to assess the overall satisfaction of the students
2. to find out the association between demographic characteristics and student's satisfaction

Methodology

- **Survey Design**

The investigator develop a comprehensive survey instrument with a combination of closed-ended and open-ended questions.

Which includes Likert scale questions with a scoring of 1-5 to quantitatively measure satisfaction levels and provide space for qualitative comments to capture nuanced feedback.

- **Sampling**

The investigator randomly selects a representative sample of students across different academic years and programs. And ensured an adequate sample size to ensure the study's findings are statistically significant and reflective of the broader student population.

- **Data Collection**

Distribute the survey electronically through Google forms which comprises structured statements and encourage high participation rates through clear communication about the survey's importance and potential impact on the enhancement of student experience.

Data Analysis

Utilize statistical methods to analyse quantitative data, computing descriptive statistics and identifying patterns in satisfaction levels and association between the demographic characteristics and student's satisfaction.

Recommendations and Reporting:

- Synthesize findings to generate actionable recommendations for improvement based on both quantitative and qualitative insights.
- Prepare a comprehensive report detailing the study's objectives, methodology, key findings, and proposed enhancements to be shared with relevant stakeholders.

Implementation of Changes:

- Collaborate with institutional stakeholders to implement identified improvements in facilities and the evaluation system promptly.
- Communicate changes to students, demonstrating responsiveness to their feedback and commitment to continuous improvement.

Major findings and Its Implication

	1 ST SEM	3 RD SEM	4 TH SEM	3 RD YEAR	4 TH YEAR
RATE OF SATISFACTION					

The findings of this study have implications for the institution's strategic planning and resource allocation. Addressing the specific recommendations, such as providing more space for recreational activities, extending

library hours, and adjusting out pass regulations, can contribute significantly to a more supportive and fulfilling learning environment.

Discussion

The survey results reveal a notable overall satisfaction among students regarding institutional facilities and the evaluation system. The high satisfaction levels underscore the institution's success in meeting certain expectations. However, the survey also highlights valuable areas for improvement, with students expressing the need for an expanded ground space, extended library hours, and increased outpass hours.

The positive findings suggest that the institution has laid a solid foundation for student satisfaction. The constructive feedback received emphasizes the importance of continuous improvement, and the institution's commitment to addressing the identified concerns demonstrates a proactive approach to enhancing the student experience.

Conclusion

In conclusion, this cross-sectional survey on student satisfaction provides valuable insights into the strengths and areas for improvement within our institution. By actively engaging with student feedback and implementing necessary changes, the institution can further elevate the overall student experience. This study underscores the importance of regularly assessing student satisfaction to ensure the institution remains responsive to evolving needs, fostering an environment that nurtures academic success and personal development.
