

YOU ARE THE PERSON I LIKE AND LOVE THE MOST IN THE WORLD

Mohan Basnet, Gauhati University, Guwahati-781014 Assam, India]

Chapter 1

You are the most loved and loved person in the World.

How much I feel your love, how can I say ?

Perhaps eternal, without end.

This is my love that is immortal, I will never forget you.

I love you so much.

How beautiful you look, how can I express !!!!!

You are very beautiful.

You are truly a source of inspiration.

related to you is incomparable, which cannot be explained in detail !!

When I remember you with the feeling of my love, this feeling gives birth to a strange love for you it awakens in me

;

It gives me immense pleasure ;

It makes me happy;

It inspires me;

It has given me the strength to keep smiling;

It has given birth to a new light in my personality ;

Everything

There is no alternative in the World that can be weighed against your comparison.

You are really an incomparable woman who is the embodiment of Goddess, whose comparison is not in the Universe, perhaps that is why I have given you a higher rank than the Universe.

Outside our Universe there are many other Universes according to the scientists, you are a bright star in these eternally existing Universes.

Even if Universes do not exist eternally, space exists beyond our Universe infinitely, even in this space you are a bright star that illuminates this space.

How can I forget your humble qualities ?
You are a visionary woman ;
You are a quiet woman ;
You have seriousness.
You are a mine of affection ;
You are a responsible person ;
You are a great woman with a patient nature ;
You possess all the qualities of a great personality.

How can I forget you !
You have eternally existed within my heart ;
Wherever you live, my heart and love with you ;
When you laugh, my heart laughs ;
When you are in pain, my heart also feels pain ;
When you are happy, I am happy ;
Always my heart and love are with you ;
When you cry, my heart also cries.
When you go somewhere far away, my heart and love go with you.

Loving someone well is a natural gift ;
There is no selfishness hidden in this kind of love ;
This refined love is free from lust ;
This love is very sacred ;
Those who love in this way, love in a holy emotional way ;
They expect the same love, from those they love ;
With the motivation of this love, the most difficult tasks are completed and become successful.

A true loving heart realizes that the situations that can happen and are likely to create some kind of bitterness in the mind of the person they love.
I myself, as my heart and love, am not only where you are, but I find you where I am ;
I feel you are always with me.
It seems like you are supporting me in every work I do.
Sometimes it seems as if the original path has been shown to me, when I have lost my way.
Whenever I go somewhere, it seems like you go with me.
When I am drowning in sorrow, I find you smiling with happiness.

Chapter 2

Mohan Basnet understood the secret of the creation of the Universe before inventing the theory that would make the solar system immortal.

Without understanding this mystery, immortality of human beings and the solar system would not be possible and this researcher first started studying and researching by trying to know the secret of the creation of the Universe and was also successful.

Now the team working to provide immortality to humans needs to understand the secret of the Universe and to provide immortality to the solar system, it is also necessary to know the secret of the Universe, and I find them in a state where this great scientist and her other research assistant scientist friends are also in the process of understanding the secret of the Universe.

The secret of the creation of the Universe as propounded by Mohan Basnet is as follows :

How does our Universe come into existence ?

The Universe was created by nature.

What is nature ?

The Nature is what we know as energy in science.

Who created energy ?

Energy is not created by anyone, it has existed since eternity and will continue to exist throughout eternity.

Is energy immortal ?

Energy is Immortal.

Is there any proof that energy is immortal ?

There is proof that energy is immortal.

What is that evidence ?

The proof on this is known as “law of conservation of energy”.

According to this law energy cannot be created, nor can it be destroyed, it can only be changed from one form to another form.

It is clear from the application of this law that when it is changed from one form to another, it can be changed from the changed form to its original form.

Here is an example of this :

Electrical Energy can be converted into Mechanical Energy and again Mechanical Energy can be converted into Electrical Energy.

The great scientist and her fellow research scientists believed that the theory propounded by Mohan Basnet that a dead person could be revived would be possible.

If Electrical Energy can be converted into Mechanical Energy, it can kill a living person and again when Mechanical Energy can be converted into Electrical Energy, it will be possible to revive a dead person.

Mohan Basnet writes that the Universe is a natural creation, it is eternal and has no beginning and no end. It will remain in space forever, as evidenced by the new Celestial Bodies being born in the Universe.

What do we mean by Celestial Bodies ?

The Celestial Bodies is the Plural form of the Celestial Body, the Singular is the Celestial Body.

Stars, Planets, Satellites, Asteroids, Comets, Black Holes, etc. are known as Celestial Bodies in the Plural form and like a planet “Earth” is a Celestial Body because there is only one planet that is “Earth”.

The Earth and Sun are called the Celestial Bodies at once, more than one is called Plural form and only one is called Singular form, when the Sun and Earth come together then they are called Plural form.

The matter mentioned by Mohan Basnet that the Universe will remain permanently in space for an infinite period of time, this statement is not Mohan Basnet's, it is a true fact of science.

This great scientist and her fellow research scientists believe that the Universe will always remain permanently in space, because the process of transformation of old celestial bodies into new celestial bodies is constantly in the Universe.

Mohan Basnet further writes that how are Supermassive Black Holes created in the Universe ?

In answer, he writes "the creation of small Black Holes" in the Universe occurs from the dead Celestial Bodies except the Black Holes.

These Celestial Bodies can belong to any Galaxy except the Black Holes which evolve as the Black Holes after their death.

All of the celestial bodies in such a Galaxy except the Black Holes combine after their death to form a Supermassive Black Hole.

Now the Supermassive Black Holes created in this way develop Galaxies in the Universe.

During the development of some Galaxies, all the powers of these Supermassive Black Holes are used, so we do not find Supermassive Black Holes in the centers of such Galaxies.

When some Galaxies are created by the Energy of Supermassive Black Holes, all the powers of these Supermassive Black Holes have not been used and we find the existences of Supermassive Black Holes in the centers of these Galaxies.

Mohan Basnet writes that how are Galaxies created in the Universe ?

In response, Mohan Basnet writes that Supermassive Black Holes create Galaxies in the Universe.

Apart from Galaxies, there are many types of celestial bodies in the Universe, such as the solar systems, the Galaxy Clusters, the Superclusters, the Stars, the Planets, the Satellites, the Asteroids, the Comets, the Black Holes, the Ordinary Energy, the Ordinary Matters, the Dark Matter, the Dark Energy, etc.

Energy is divided into two parts, one part contains those energies which are related to positive charge, the other part contains those energies which are related to Negative Charge.

What is Fundamental particles of Energy ?

Those particles of energy are called Fundamental Particles of Energy which are indivisible.

Electrons are considered as fundamental particles of energy and they have Negative Charge.

Fundamental particles of energy which are related to positive charge have not been discovered yet.

Fundamental particles which are associated with positive charge and Fundamental Particles which are associated with Negative Charge, those two types of particles together form Quarks, Quarks are also divided into positive charge and negative Charge, those two different charge of Quarks form Protons and Neutrons.

Protons, Neutrons, and Electrons make atoms, atoms make molecules, and molecules make up the entire Universe.

Mohan Basnet prepares a research paper on quantum gravity about gravitational power of our Universe, he shares this paper to ResearchGate and dispatched it to Novus Publishers Italy for publication.

This work of Mohan Basnet gives unlimited enthusiasm to this great scientist and her fellow research scientists because the successful discovery of quantum gravity prepared by Mohan Basnet will fully support the successful travel from Earth to other celestial bodies as these scientists continue to immortalize our solar system.

Chapter 3

Here, I find her as a great scientist leading the campaign to immortalize our solar system.

Here I find her able to carry out this program successfully.

Here, I find her that the theory propounded by Mohan Basnet has been put into practice under the successful leadership of this great scientist.

According to the theory invented by Mohan Basnet ("The Methodology to Keep Our Solar System with Each Human as Same Existences For Ever in the Universe") to immortalize our solar system, materials for building tools that can survive at the highest temperature of the stars are being tested successfully under the skillful leadership of this great scientist.

After these tests are completed within a period of three years, the campaign to make our solar system immortal, proceeds successfully under skillful leadership of this great scientist.

Under the skillful leadership of this great scientist, another very important task is being tested which is to build such kind of vehicles whose speed is greater than the speed of light.

After the success of this test, the construction of such kind of spacecrafts in the required number began under the skillful leadership of this great scientist.

Even the construction of air conditioning space stations advocated by Mohan Basnet is progressing successfully under the skillful leadership of this great scientist.

The elements that are needed to immortalize our solar system are brought from the stars, planets and satellites which are situated outside from our solar system by the help of bulldozers so that the construction of bulldozers also is started under the skillful leadership of this great scientist.

This entire campaign which involves human beings in terms of operational power to keep our solar system immortal, the necessary education and training for these humans are provided under the skillful leadership of this great scientist.

Now the work of immortalizing of our solar system begins under the skillful leadership of this great scientist.

This great scientist needs complete knowledge about our solar system to keep it immortal and I find that she is moving forward to acquire this knowledge.

Mohan Basnet's research paper mentions the information related to the solar system as mentioned below.

Information about our solar system :

Our Solar System is a member of the Milky Way Galaxy.

This Galaxy was born from a Supermassive Black Hole, named Sagittarius A.

The Supermassive Black Hole that gave birth to this Galaxy is Sagittarius A that was developed after the death of this Galaxy.

Our Universe is made up of Dark Matter, Dark Energy, Ordinary Matters, and Ordinary Energy.

Science has learned very little about Dark Matter and Dark Energy, so here, I will not mention anything about Dark Matter and Dark Energy.

Ordinary matters and Ordinary Energy give birth to stars, planets, satellites, black holes, comets, asteroids, etc. known in science as celestial bodies.

All these are in the Observable Universe.

Only about 5% of our Universe is made up of the ordinary matters and ordinary energy.

And about 95% of our Universe is made up of the dark matter and dark energy.

This great scientist re-examines whether the ordinary matters and ordinary energy make up 5% of the Universe, with the help of her fellow research scientists, with the aid of Astronomical Spectroscopy.

Also, with the help of other research scientist friends, she re-examined once again whether 95% of the Universe is made up of the dark matter and dark energy, with the help of Astronomical Spectroscopy.

According to Mohan Basnet's research paper the Sun is made up of the following elements with their different percentage.

What elements is the Sun made of ?

Below are the elements that make up the Sun :

Hydrogen 91.2% ;
Helium 8.7 %
Oxygen 0.078 % ;
Carbon 0.043 % ;
Nitrogen 0.0088 % ;
Silicon 0.0045 % ;
Magnesium 0.0038 % ;
Neon 0.0035 % ;
Iron 0.030% ;
Sulfur 0.015 % ;

Source :-

<https://www.thoughtco.com/element-composition-of-sun-607581>

This great scientist examines the different percentage of the various elements mentioned above with the help of her team using Astronomical Spectroscopy.

According to the research paper prepared by Mohan Basnet, there are eight planets in our solar system and the satellites of each of them as mentioned below.

What planets are found in our solar system ?

And what are the satellites of each of these planets ??

There are eight planets in our solar system, their names are mentioned below :

Mercury ;

Venus ;
Earth ;
Mars ;
Jupiter ;
Saturn ;
Uranus ;
Neptune ;

Source :

<https://science.nasa.gov/solar-system/planets/>

How many satellites does each planet have in our solar system ?

Below I have explained the fact that how many satellites are there for each planet in our solar system :

Earth - only one ;
Mars - two ;
Jupiter - 95 ;
Saturn - 146 ;
Uranus - 28 ;
Neptune - 16 ;

Source :-

<https://spaceplace.nasa.gov/how-many-moons/en/>

In order to know the truth of the information mentioned in Mohan Basnet's research paper about different planets of our solar system and the number of satellites of each those planets, this great scientist studies articles from different sources.

The theory propounded by Mohan Basnet is about how space stations are built to keep the solar system immortal is as follows :

Structures of Space Stations :

Space Stations including Airports ;
Space Stations with Air Conditioning ;
Space Stations including Industrial Areas ;
Space Stations with Health Services ;
Space Stations with storage of essential materials ;
Space Stations with Garages ;
Space Stations with Petroleum Pumps ;
Space Stations with residential areas ;
Space Stations including laboratories ;
Space Stations including educational fields ;
Space Stations with daily essential services like grocery store, clothing store, etc. etc. including a mini market ;
Space Stations with administrative offices ;

In this theory propounded by Mohan Basnet, the great scientist also thinks deeply about the addition of some other features to Space Stations to help immortalize our solar system.

Following are the principles of construction of bulldozers, propounded by Mohan Basnet.

How are the bulldozers constructed that are used to immortalize our solar system ?

Regarding the construction of bulldozers, it is mentioned here :

The construction of bulldozers is performed by the use of materials that can survive in the highest temperature of the stars.

Under the skillful leadership of this great scientist, testing of those kinds of materials is performed which can be survived in the highest temperature of the stars and bulldozers are constructed by using those materials.

A theory is here, that is propounded by Mohan Basnet on how spacecrafts can be protected from the extreme temperatures of the stars.

Construction of spacecrafts will be constructed so as not to be affected by the extreme temperatures of the stars.

During it's construction, it is managed by temperature regulating materials so that it is not affected by the extreme temperatures of the stars.

It's ability to fly is kept higher than the speed of light.

Meanwhile, under the skillful leadership of this great scientist, materials that can protect the spacecrafts from the highest temperature of the stars have been successfully tested.

Under the skillful leadership of this great scientist, the testing of petroleum that is capable of making the speed of spacecrafts more than the speed of light, has been tested, according to the guidance given by Mohan Basnet.

In the theory propounded by Mohan Basnet how the stars are formed is briefly explained here.

Composition of the stars :

Stars are mainly made up of hydrogen and helium gases.

Stars also contains elements like Carbon, Nitrogen ,Oxygen, and Iron, in normal Amounts.

Link

<https://coolcosmos.ipac.caltech.edu/ask/205-What-are-stars-made-of-#:~:text=Stars%20are%20made%20of%20very,their%20lives%20create%20heavier%20elements.>

The great scientist re-examines the related elements explained by Mohan Basnet in relation to the composition of stars using Astronomical Spectroscopy.

The summary of the theory that is related to keep our solar system immortal propounded by Mohan Basnet :

Before balancing the levels of elements of all the planets including the Sun and the satellites of all these planets, the "Actual Datas" of all them are prepared separately.

Astronomical Spectroscopy will be used to determine this "Actual Datas".

After determining the "Actual Datas" of all the planets including the Sun and all the satellites of all these planets, the process of balancing the levels of elements of the solar system begins.

Imbalanced levels will be balanced according to the principles of the theory propounded by Mohan Basnet.

First balance will be done after 50 years of determination of "Actual Datas".

Now for the second time after 100 years.

Third time after 500. years.

Fourth time after 1,000 years.

Five time after 3,000 years.

Sixth time after 10,000 years.

Seven time after half a million years.

And will be permanently rebalanced every million years.

All these activities are carried out under the skillful leadership of this great scientist.

In this way we can make the solar system immortal.

When the solar system becomes immortal, then every human can attain complete immortality.

Humans will attain immortality through the successful use of Element Therapy, a theory propounded by Mohan Basnet.

This great scientist will lead to convert all these success into reality.

To bring the elements needed to immortalize the Sun and all other planets of the Solar System and all it's satellites, the work begins first in the Centauri, the closest star to the Sun, under the skillful leadership of this great scientist.

Hydrogen gases exist in the cores of the stars.

Helium Gases exist in the outer cores of stars.

To protect the vehicles used here from the gravity of the stars, that method has been adopted which our forefathers have taught us in the meantime.

There will be Space Station near to the Centauri star that will help operate the Centauri.

Another Space Station will be near the Sun which will help to work on the Sun.

Elements will be separated from their compounds on the space station near the Sun.

That is, the various elements required by the solar system will be separated from their compounds.

After separating these elements from their compounds will be used according to needs of all other planets including the Sun and all the satellites of our solar system.

All these works are progressing under the skillful leadership of this great scientist.

Hydrogen gases will be supplied to the Sun without stopping.

The Sun converts 600 billion kilograms of Hydrogen Gases into Helium Gases each second.

To make the Sun immortal, the same amount of Hydrogen Gases must be supplied to the Sun as it converts Hydrogen Gases into Helium Gases every second.

These Helium Gases will be extracted from the Sun and taken there from where the elements needed by the solar system are brought.

And all the elements of higher levels of the planets including the Sun and the satellites of our solar system will be taken there from where the elements needed by the solar system are brought.

This type of activity goes on for several million years in the Centauri star.

Apart from the Hydrogen Gases required by the Sun, other elements will also be brought from the planets and satellites located outside the Sun.

Source :

https://en.m.wikipedia.org/wiki/Nuclear_fusion

After running out of hydrogen gases in the Centauri star, work begins on the second nearest star to the Sun, under the skillful leadership of this great scientist.

A space station is established near this star, again under the skillful leadership of this great scientist.

In the same way, one after the another, going to the stars, and other planets and satellites that are close to the Sun, bringing elements needed by the solar system to the solar system has been done for several years.

In the same way, the higher levels elements of all the planets and satellites, including the Sun of the solar system, are carried out to those stars and other planets and satellites from where the needful elements for solar system will be brought.

During this period, the Universe regenerates new stars and other planets and satellites.

And we can go to those new stars and planets and satellites to bring the elements needed by the solar system.

And also we can transfer the higher levels of elements of the solar system to those new born Celestial Bodies.

In this way, under the skillful leadership of this great scientist, the work of immortalizing the Sun, other planets including all satellites of the solar system is progressing towards the beginning and completion.

Chapter 4

Love blossoms in a place where to stay together is impossible, and oblivion is impossible.

Love is only a deep reflection of affection, which has no end, and it is an eternal form.

Really, love is a different form of complex affection, where to stay together is not possible, and forgetting each other is also not possible.

One such kind of affection is trying to develop into love between you and me, if it is a true love, it will definitely develop, no matter what.

No obstacle can stop this holy love from developing , not even you and me.

If this kind of love develops between us, we can never be happy again !!

Forever the memories of each other will haunt us both extraordinarily.

Let me not take you with me on this love journey of mine ;

You feel sad ;

I swim alone in the ocean of my love ;

When you finally sat down outside on the shore, I feel that you were with me !

Don't love me as much as I do, because that kind of love will make you sad.

Love me just a little, which doesn't make you sad ;

Now we have such a love relationship with each other, right ?

This kind of love is not under anyone's control ;

When and with whom does it happen ?

Even those who love themselves do not know.

This kind of love is very rare in the World.

And in the World this kind of holy love is found in destiny.

Love is only related to the pure feelings of the mind.

It should not expect anything more from each other than a sacred emotional relationship, why are you keeping yourself away from such a sacred relationship ?

Love is only a deep reflection of affection, which has no end, therefore it is eternal.

Love sees only affection.

Lovers feel the mistakes of boyfriend and girlfriend as love.

No evil thoughts are born, within the hearts of the lovers, their faults in each other, they despise it.

I love you, and even though you are a very dangerous enemy for my sake, I trust you.

And whatever dangerous plans you may devise, I think you will not harm me (you may harm me) , I love and trust you, to whatever dangerous place you call me, I will be there (you may harm me) , I will not mistrust you because in my mind you are my everything.

A love proposal is a custom that has been going on in human society for a long time and is still going on today.

According to this custom, both married and unmarried people or men to women or women to men, put their feelings of love to each other as a love proposal.

For this reason, it can not be denied that the practice of a married man making another woman, who may both married and unmarried his second wife exists in human society.

I have established you in my heart by remembering as the true form of the Goddess ;

I know, we never can live together after all !!!

The pain of separation with you, that is, the mental pain of not being able to stay together with you, will last forever for me, and in the days to come, you will also have the same pain as mine ;

After all, this is what love is all about !!

Both of us should be satisfied with this truth.

We are left with no other option ;

This is a true depiction of the human brain !

Think for yourself, love between us, has it developed according to the plan of both of us ?

It happened suddenly without thinking !!!!!

This love was born in my mind and I add you in it !

You had no way to avoid it, because in human society, either a man or a woman puts their feelings of love to each other as a love proposal, and the who proposes, the one who is proposed to, start to love and they give love proposal, love feelings start to blooming in that person's heart who had received love proposal from other people, this happened to you too !!!

But love is a different form of really complicated love, where to live together is not possible, each other is not even possible to forget each other !!!!!

After all, this is what love is all about !!!!!

What ever happens, we must accept it with ease.

I was afflicted by my own, my love for you, from whence and how such a love was born in my heart, which burns me-self ;

Maybe love is born like this !

Anyone is not in control when, where, and with whom love happens !

When I try to forget your memory, it increases more and more !

And I never thought that I would have such an indelible love with you ;

I can't even forget you !!

Go, see, what is going on with the love born in my heart for you ;

Every human being has feelings, within these feelings there is a love feeling, some of them have these love feeling in inactive state and some of them are suddenly coming out of this love feeling, which came with me !

There is no human without feelings.

Look, what is happening now !!

I try to control myself as much as possible, otherwise I see no other way than to suffer.

My love for you is a great weakness, but I am not the only one ;

This is the situation of all those who love truly ;
They don't get love from those they love.
But even after knowing this reality, they do not stop loving.

If you weep I cannot tolerate.
How does it hurt me when you don't cry ?
And how can I see the cry ??
I can't watch you cry !!
I cannot bear to see you suffer so little as a sesame seed, if I tell you in the language of science, there is nothing in the Universe smaller than the fundamental particle of energy, I can't bear suffering and pain equal to this in you ;
The definition (meaning) of love is also like this.

I present you in the role of a great scientist in this epic book written by me.
Because you are my girlfriend, and this poem carries my works and isn't it your responsibility to help me in all my work ?
My heart is filled with joy, showering my love upon you ;
Maybe I will never get your love from you !
My love for you will always be one-side love and infamy love !
I have experienced great joy to be able to develop the poem related to you in the form of an epic book !
Even if any work is too long, I feel sad, you know, this is the long work I have done in my life, it is also a privilege to be able to do such work, how can everyone get such a privilege, right ?
This may take some time to be completed ;
Perhaps the work of writing this poem about you will never be finished ;

I think it will be published soon.
It is not printed in paper, but published as an online E-Book.

This PDF is with us, this epic will be available in this PDF.

The epic book related to you is not printed in Nepali language, it is published online in English language.
I myself am also going to write it in Google Docs to make a PDF in Nepali language, and it will be available to us as a PDF in Nepali language, this PDF will contain the Nepali Version of this epic.

You are probably wondering how I could turn this poem of yours into an epic book, aren't you ?
I have got the power to make an epic of epic, even epic-epics, from the inspiration of my love for you.
For example, the subject of writing should be many, and only then it will become an epic book, for this, I will put the imagination that you have been with me in all my activities from the past to the present into a real composition.
Then think, will this poem be an epic book or not ?
I will try my best to make these poems as a book of epic about you a masterpiece, while this book deserves a Nobel Prize, and I will continue to write poems about you.
My love for you has made me an epic-poet.
Your memory fills my heart with boundless happiness, because of which I get strong inspiration, and find courage to complete the most difficult tasks, like, I was never a poet, and could not write a single poem, but today inspired by you, I am only not become capable to write poems related to you, but also I thought that I could decorate this book of epic in the highest form, from which I have a strong hope that one-day this book of epic can get the Nobel Prize.

Also, many other works of mine are worthy of Nobel Prizes, such as, Element Therapy Theory which will cure all kinds of diseases of humans ;
Element Therapy Theory that can bring dead people back to life ;
Element Therapy Theory, which can naturally regenerate damaged kidney, (like this all the damaged organs of the people) ;

Element Therapy Theory which can make everyone immortal ;

Element Therapy Theory which succeeds in bringing old people back to a youthful state ;

There is another Theory, which can immortalize all the planets including the Sun and all the satellites of our solar system, etc. etc., there are many which can be selected for the Nobel Prizes one day tomorrow.

The one who truly loves someone, even if he doesn't get acceptance from the person he loves, he is still loving, now he doesn't give this love anywhere else.

It is this love that motivates him in life, and he succeeds in even the most difficult tasks.

You have been the sole source of this epic of mine which is related to you.

Although I am the author of this epic, it would not have been possible without you ;

You are a creative woman, you are the creator of the epic, that I am currently writing about you, the title of which is "You are the Person I Like and Love the most in the World" , therefore, if this epic book will be selected for the Nobel Prize at this time, half of this amounts coming from the Nobel Prize will be Yours.

I don't know why I can never forget you.

This love is truly extraordinary !!

This love is so extraordinary that it made me the Poet of an epic, and even after writing this epic, the love in my heart for you will not finish, and even after the publication of this epic book I will remember you and write your poems.

I will keep writing, if the application of my Element Therapy can make humans immortal then also I will keep writing the poems about you by the help of which grows out of the love in my heart for you.

Chapter 5

Element Therapy invented by Mohan Basnet which can cure all kinds of diseases of humans, it can bring back the old condition of humans to a young state, it can re-develop damaged body parts of humans in a new and natural way, it will help to keep humans immortal, It can revive a dead person, this great scientist is working to make this invention of Mohan Basnet a reality.

To succeed in these works one after the other, this great scientist and her other supporting research scientists seem to be leading programs to use Element Therapy to cure all diseases in humans.

Therefore, before using Element Therapy in humans, it is necessary to test this therapy, so this team of scientists and engineers are going to test it in rats.

The research team, including this great scientist, selects a small number of mice for this experimental work.

Now determine the percentage of each of these elements in the body of each of these selected rats. The number of these rats was 5 and they were named A, B, C, D, E to identify each of them.

In the body of of a healthy rat named A, Hydrogen 25%, Oxygen 20%, Carbon 15%, Aluminum 10%, Iron 15%, Calcium 8%, and Sulfur 7% suppos, were found.

Testing begins in mice.

research team enters

the virus of HIV into the body of this "B" named mouse.

After entering the HIV disease spores into the body of this mouse, the body of this mouse is examined once again.

When this great scientists and her team found evidence that the disease had developed inside the rat's body, the research team seemed to be trying to cure the disease in this mouse.

The

Now, after the work of entering the body of this mouse with the spores of HIV disease is completed, the percentage of the elements of this mouse's body is again tested by these great scientists and her team.

These researchers found that inside the body of this rat, Oxygen 20%, Hydrogen 29%, Carbon 15%, Aluminium 10%, Iron 15%, Calcium 8%, and Sulfur 7% . Here they found Hydrogen is at a higher level, the amount of Hydrogen has increased, and this increase is 4%, that is, this time Hydrogen is 33%.

Now I see that the instructions given by Mohan Basnet to cure all kinds of diseases of humans are being followed letter by letter by this great scientist and her research team.

According to Mohan Basnet, in order to cure the diseases in the body of these rats, some cells from the body of these rats must be separated from the body of the rats.

The surgeons in the team of research scientists take out a sample of cells from the body of this rat and determine the elements and the different percentage of these elements here, this research team obtains Calcium 27%, Carbon 19%, Aluminum 16%, Oxygen 19%, Hydrogen 19%, from the cells taken out from the body of this rat.

Now, to cure the disease, they inject Calcium 27%, Carbon 19%, Aluminum 16%, Oxygen 19%, and Hydrogen only 15%, from the medical store into the rat's body with the help of a syringe.

Now once again they check the status of Elements in the body of this mouse, they find the healthy percentage ie Hydrogen 25%, Oxygen 20%, Carbon 15%, Aluminum 10%, Iron 15%, Calcium 8%, and Sulfur 7%. which these researchers obtained from the healthy test in the body of mice.

Thus, after successful testing of Element Therapy in mice, this research team will use this Element Therapy in humans.

Use of Element Therapy in Humans :

This is the first time in the world that this great scientist and other scientist friends who support cancer patients use this element therapy.

First of all, they do a test to know the condition of elements in the body of this patient, from which these great scientists and other scientist friends found Hydrogen 13%, Oxygen 65%, Carbon 18%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, get these elements in trace amounts.

And 3% get higher level hydrogen gases.

Now again they test the condition of elements in a healthy human body and get Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1% . , Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, get these Elements in Trace Amounts.

Now some surgeons of this research team take out a sample containing some cells from the patient's body, and determine the percentage of elements in this sample and obtain suppose, Oxygen 19%, Hydrogen 19%, Carbon 19%, Aluminium 16%, Calcium 27%. Here they found Aluminum as higher level, total percentage of Aluminium was 18 % which they got from the disconnected cells.

Now, to cure the disease, they inject Oxygen 19%, Hydrogen 19%, Carbon 19%, Calcium 27%, and Aluminium 16% from their store into the patient's body using a syringe, and after testing, they get the same elements as a healthy person's percentage or Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%,

Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, Iron, Cobalt, Copper, Zinc, Iodine, these elements are found in trace amounts, so they are found in the condition where the disease is cured.

Here again, these great scientists and her research scientist friends are stepping forward to treat another HIV-infected patient.

Before treating these patients for HIV disease, they determine the percentage of different elements in the patient's body, these great scientists and research team.

For this purpose, the body of these patients is tested, and they get, Oxygen 67%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%. %, Magnesium 0.05 %, Iron, Cobalt, Copper, Zinc, Iodine, these elements are found in Trace Amounts.

Now I find that these research scientists are advancing to know about the condition of different elements of a healthy person's body in order to cure HIV-infected diseases.

The percentage of elements in the body of this healthy person is Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, these elements are found in trace amounts by great scientists and research scientists.

Now these great scientists and her research assistants are moving forward to cure another disease.

The name of the disease inside this human body is Salmonella.

Before starting the work of curing this disease, these great scientists and her research team test the elements in the body of the patient suffering from Salmonella disease and get that Oxygen 67%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%. , Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, these elements are found in trace amounts.

Another healthy person's percentage of elements in his body is tested and finds that Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%. , Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, get these Elements in Trace Amounts.

Now this research team is moving forward to start curing patients suffering from Salmonella disease.

Some surgeons of this research team perform an operation and take out a sample of cells from inside the patient's body and test and obtain Oxygen 21%, Carbon 19%, Hydrogen 19%, Calcium 27% and Aluminium 16%. They got into body of this person as higher level 2% Oxygen.

Now, with the help of syringe to cure the disease again, Oxygen 19%, Carbon 19%, Hydrogen 19%, Calcium 27%, Aluminium 16% they have supplied into this patient's body.

After this they again examine the patient's body and find that the patient has recovered.

This great scientist and her other research friends begin the process of curing another Alzheimer's disease patient. For this purpose, they first examine the percentage of elements in the body of a patient suffering from Alzheimer's disease.

From this test, Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 0.1%, Potassium 0.2%, Sulfur 4%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron. Cobalt, Copper, Zinc, Iodine, these Elements get in Trace Amounts.

Now in order to cure the patient suffering from Alzheimer's disease, this research scientist and her fellow research scientists examine the different percentage of elements in the body of another healthy human being and they found

Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2 %, Sulfur 0.2 %, Sodium 0.1 %, Chlorine 0.2 %, Magnesium 0.05 %, and Iron, Cobalt, Copper, Zinc, Iodine, these elements in trace amounts.

Now, in order to cure these Alzheimer's disease patients, these researchers, great scientists and her research team, operate on these Alzheimer's disease patients and take out a cell containing some elements.

And they test and get from that cells, Oxygen 19%, Carbon 19%, Hydrogen 19%, Calcium 27%, and Aluminium 18%

Now with the goal of curing Alzheimer's disease patients, Oxygen 19%, Carbon 19%, Hydrogen 19%, Calcium 27% and Aluminium 16% are injected into the patient's body with the help of a syringe. Here, they got into this patient's body as higher level 2% Aluminium.

And again they test the percentage of elements in the patient's body and get that the patient is cured.

This great scientist and her other research assistant scientist friends started working to make the theory propounded by Mohan Basnet which is related to bringing old people back to a young state into reality.

For this purpose, this great scientist and her other research assistant scientists test the elements in the body of an elderly person and find that Oxygen 67%, Carbon 19%, Hydrogen 13%, Nitrogen 3.3%, Calcium 2.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, in Trace Amounts.

Now they start working to make this old man young again.

With the goal of rejuvenating an old man, they test the percentage of elements in the body of another young and healthy man and find that Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, get these elements in trace amounts.

They do an operation from inside the body of the old man and take out a small cell containing some cells.

And they test and get that Oxygen 21%, Carbon 20%, Hydrogen 22%, Calcium 28%, Aluminium 17%.

Now, to make this old man young again, this researcher great scientist and her other supporting research scientists injected Oxygen 19%, Hydrogen 19%, Carbon 19%, Calcium 27%, and Aluminium 16% are supplied into the body of this old man with the help of a syringe and tested and seen and since the percentage of elements in the body of this old man is equal to the percentage of the elements in the body of a young man, this old man has returned to a young state. They get real results.

Now, the theory propounded by Mohan Basnet that the destroyed parts of the people are rebuilt in a new form and in a completely natural way, and the work begins to make them functional again by this great scientist and her team. For example, this great scientist and her assistant research scientists are working to create new eyes naturally for the people who are born blind.

In this way, in order to prepare the destroyed organs in a new form and to enable people who lack these organs to get a new functional organ again naturally, different percentages of the elements in the body of this person should be tested and that percentage should be equal to the percentage of the elements of the human body who have all the organs. We need to wait, this system will take some time to create a new organ, from time to time the percentage of the elements of the person whose organ was destroyed should be kept equal to the percentage of the elements of the person who have all the organs correct, until that time the new organ of the person who lacks that organ will be created naturally.

Within a very short period of time, these human body parts will be created.

These great scientists and their teams now carry forward the work of reviving dead people.

Making this program a success is somewhat complicated, but possible.

This great scientist and her team determine the percentage of elements in the body of a dead person.

Now 37° heat temperature is added to the dead person's body by the incubator device.

Now, after that 37° heat temperature is added to the body of a dead person, that dead person becomes alive because after death, the other elements will remain in the body of the dead person as same when he or she was alive but only in death people lose 37° heat temperature.

We can know from the position of this human body whether these dead people have come back to life or not, if the decomposition of this body is continuous, then this body has not been converted into a living body, if the decomposition of this body has stopped, then we must understand that this body has been converted into a living body.

Now we have to connect this body with life support system.

And the percentage of the elements of this human body that is still alive should be determined and equaled with the percentage of the elements of the young human body.

By doing this, blood circulation and breathing functions can be successfully initiated in the body of a fully alive person. If not, another method should be adopted, that is Acupuncture System.

Even after adopting this technique, if the blood circulation and breathing functions are not successful in this human body that is fully alive, another system should be used in this human body, this system is an artificial pump.

By doing this, blood circulation and breathing functions will be carried out successfully.

Now these fully alive people should be done according to the principle of Element Therapy proposed by Mohan Basnet, then these fully alive people can be developed like other human members of human society.

This great scientist and her team lead to successful use of Element Therapy, the theory propounded by Mohan Basnet.

They test the elements in the living human body of this patient and find that Oxygen 67%, Carbon 20%, Hydrogen 13%, Nitrogen 4.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine. 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, get these Elements in Trace Amounts.

This great scientist and her research scientist friends take out a sample containing some cells from the body of a living human patient, and test it and find that Oxygen 21%, Carbon 21%, Hydrogen 22%, Nitrogen 20%

Now to balance the elements of the human body, another healthy and young person's elements level is tested and obtains that Oxygen 65%, Carbon 18%, Hydrogen 10%, Nitrogen 3.3%, Calcium 1.5%, Phosphorus 1%, Potassium 0.2%, Sulfur 0.2%, Sodium 0.1%, Chlorine 0.2%, Magnesium 0.05%, and Iron, Cobalt, Copper, Zinc, Iodine, get these elements in trace amounts.

Now, with the help of a syringe from their store Oxygen 19%, Hydrogen 19%, Carbon 19%, Nitrogen 16%, Calcium 27%, enter inside the body of this fully alive people. Here, they got as higher levels of Oxygen 2%, Carbon 2%, Hydrogen 3%, Nitrogen 1%.

This great scientist and her research assistant other scientists test the percentage of elements in the body of these fully alive people and get this percentage equal to the percentage of the body of other living and young human being and this fully alive people return from death and find the same condition as a young human.

This great scientist and her team start working to make humans immortal.

They also start the work of making the solar system immortal.

Now these great scientists and her research assistant scientists are working to provide immortality to humans.

In this context, this great scientist and her research assistant scientists are working to free human beings from all kinds of diseases.

These great scientists and her research assistant scientists are carrying out the work of bringing old people back to a young state.

This great scientist and her research assistant scientists are also taking forward the work of creating new organs naturally for the people who have no all organs.

These great scientists and her research assistant scientists are also working to give life back to dead people.

It seems that these great scientists and her research assistant scientists have succeeded in making humans and our solar system immortal through the successful use of all such processes.

Chapter 6

Principles propounded by Mohan Basnet to protect human beings from potential accidents:

In this regard, Mohan Basnet has given some important suggestions, with the successful use of these suggestions, human beings can be protected from possible accidents.

Suggestions:

To protect human beings from accidents involving airplanes, any airplane should be built with a double engine.

Fire-resistant materials should also be used in the construction of these types of airplanes that can provide protection to humans from burns.

It is said that to protect human beings from possible accidents caused by vehicles with four wheels or more than four wheels, small pillars should be buried on both sides of the road which can prevent the vehicles from overturning.

A separate road should be constructed for such vehicles.

Boats that operate on rivers or oceans should be built with a double engine and landing gear on these boats, as well as an additional boat that will simulate the boat carrying the humans.

Thus passengers can be protected from accidents.

When people ride motorcycles, helmets should be used compulsorily, separate roads should be constructed for such motorcycles.

A separate path should also be constructed for pedestrians.

Law enforcement can end domestic violence.

Wars must be ended and world peace established.

To protect human beings from possible accidents caused by trains, bollards should be buried on both sides of the tracks where these trains cross which can prevent the trains from overturning.

A system of such pillars should be in place on all bridges to prevent trains from derailing.

The great scientist and her fellow research scientists also find these principles propounded by Mohan Basnet as practical so that they are working to achieve such goals.

The Techniques propounded by Mohan Basnet that are related to solve the Problems which are related to Natural Disasters, Climate Change, and Global Warming in the Earth.

At first we need to determine the different percentage of different kinds of elements of the Earth by the help of existing technique with a view to solve the problems which are related to Natural Disasters, Climate Change, and Global Warming in the Earth.

Secondly we need to fix the “Actual Datas” of different kinds of elements of the Earth in order to balance the imbalanced percentage of different kinds of elements of the Earth to solve the above mentioned problems of the Earth.

The “Actual Datas” of different kinds of elements, we can fix suppose, the Year 2024 to balance the different kinds of imbalanced percentage of different kinds of elements of the Earth in future because suppose, in this Year we don't have experienced of any so big harmful conditions for human-beings by the effects of Natural Disasters, Climate Change, and Global Warming in the Earth.

In 2024 we have suppose, found the percentage of different kinds of elements of the Earth, suppose, Silicon 45.5%, Aluminium 27%, Iron 6%, Calcium 4%, Sodium 3%, Potassium 2%, Magnesium 3%, Hydrogen 1%, Carbon 1.5%, Copper 2.5%, Chlorine 0.5%, Rubidium 0.8%, Fluorine 0.2%, strontium 0.7%, Barium 0.6%, Nickel 0.9%, Lithium 0.5%, and Nitrogen 0.3%.

After deciding the “Actual Datas” of different kinds of elements of the Earth we need to balance the imbalanced percentage of different kinds of elements of the Earth to solve the problems which are related to Natural Disasters, Climate Change, and Global Warming of the Earth in the near future.

Suppose, the act of determining of the “Actual Datas” of the Earth begins in 2024.

This Year 2024 will be only the Year of determining the “Actual Datas” of the Earth.

In this Year, we don't balance the imbalanced percentage of different kinds of elements of the Earth.

In this Year, we only decide the “Actual Datas” to balance at the Next time with a view to don't give to increase the harmful effects of Natural Disasters, Climate Change, and Global Warming on the people of the Earth.

Before starting the Act of balancing of different kinds of imbalanced percentage of different kinds of elements of the Earth we need to examine and determine the different kinds of imbalanced percentage of different kinds of elements of the Earth as lower or higher or at the same time both lower and higher.

We begin the act of balancing the different kinds of imbalanced percentage of different kinds of elements of the Earth after 10 Years from the period of time of deciding the “Actual Datas” of the Earth.

It is difficult to predict definitely about the fixed period of time of balancing the different kinds of imbalanced percentage of different kinds of elements of the Earth to protect the people from the harmful effects of the Natural Disasters, Climate Change, and Global Warming in the Earth, so I suggest to balance the different kinds of imbalanced percentage of different kinds of elements of the Earth in each 100 Years.

We need to balance the different kinds of imbalanced percentage of different kinds of elements of the Earth according to the “Actual Datas 2024” of the Earth.

We need to bring our needful all elements to the Earth to balance it's imbalanced percentage of different kinds of elements from the celestial bodies which are located outside of our solar system and also we need to transfer the higher levels of all elements of the Earth to those celestial bodies from where we bring our needful elements to the Earth.

Thus, we can solve the problems which are related to Natural Disasters, Climate Change, and Global Warming in the Earth with a view to protect the people of the Earth from the dangerous effects of Natural Disasters, Climate Change, and Global Warming in the Earth.

This great scientist and her fellow research scientists are trying to apply this theory propounded by Mohan Basnet in reality.

You are the man of my heart;
 And you, the man of my heart;
 You are the person I like the most in the world;
 And you are the person in the world that I love so much.
 Words cannot describe how much I love you, it is only felt in experience;
 I have realized that I am indeed a very lucky person who has been able to express his love openly to the one whom he loves most indescribably and I am very grateful to you for giving me such a golden privilege.

It is said that love is immortal, but those who love are not immortal, I have sent a letter to the scientist-society of the world with a request to test of my this theory known as Element Therapy and use it on humans, which can make humans immortal.

The link to this theory is given below:

<https://ijesir.org/wp-content/uploads/2022/05/01000121IJESIRnew.pdf>

I am infinitely happy to feel your love, it was never before.
 It is your gift, that is, your generosity, which allowed me to love you with open heart, then I could love you with open heart and be happy.
 My love for you has brought about a significant change in my life, which was not there before, this change makes my heart rejoice when I remember you with loving feelings;
 Today, warm love for you is flowing in the blood of my body and this flow has filled my brain with happiness from heart to heart.
 You have given birth to a great epic out of love for you, I have obtained this most important work out of love for you, and will complete it (the epic book related to you).
